

AFRICA CONSULTING ARCHITECTS

## ESTABLISHMENT

Africa Consulting Architects cc was established by Jannie Laubscher during October 1993.

Jannie Laubscher has been in private practice for almost 29 years and is well established in the business community. In 1983 he co-established De Hart Laubscher Architects and when the partnership dissolved during 1993 he established Africa Consulting Architects cc.

Liesl Laubscher has over nineteen years working experience. In 1989 she joined De Hart Laubscher Architects and obtained senior architect status in 1993. She resigned in 1995 to establish her own practice, VDM Architects. During 1997 the practice amalgamated with Africa Consulting Architects cc and she was appointed principal. She has a broad client base and obtained the Government Procurement Accreditation to implement the Affirmative Procurement Policy.

## MISSION STATEMENT

- An architectural design is only successful if everyone associated with it ends up feeling satisfied.
- Architecture is organised and it is the ability to organise space, people and contracts that contribute to success.
- We take serious account of the context in which we build and we are committed to the achievement of excellence in building design through the application of classic design principles.
- We acknowledge that our clients are the cornerstone of our business and therefore we pledge to offer them quality, effective and timely service.

## THE NAME

Africa Consulting Architects cc is aimed at the broader Africa market and we aim to play a part in the reconstruction, development and renaissance of our rainbow nation. The name also ensures continuity for talented young architects aspiring for positions in the hierarchy of the firm.

## HUMAN RESOURCE DEVELOPMENT PROGRAMME

We draw staff mainly from universities and technikons around the country. The aim with our architect-in-training and affirmative action programmes is to let people grow from within. The programmes are being complemented by mentorship systems where individual guidance is offered to trainees. To encourage ownership, not only in our practice but also in the principles of free enterprise, we are developing structures that allow greater participation of staff in decision making. Sharing in the running of certain departments of the practice not only inspires greater loyalty and productivity but grows future project leaders for Africa Consulting Architects cc and the larger business community.
